## **STRAWBERRY PARK MASTER PLAN**

Clark Condon Associates led the design team to develop a Master Plan for the redevelopment of the 42-acre site. The goals of the Master Plan included using best practices with regards to land use, linking the park to the City's hike and bike trail, and incorporating some existing facilities with new, updated amenities designed to address the latest trends in recreation activities.

The theme developed for the park celebrates the history and culture of the City of Pasadena.

The Master Plan meets the challenge of balancing a wide range of passive and active recreational needs while incorporating a number of sustainability measures including bioswales, rain gardens and use of native plants.

The design team developed a creative phasing plan that will allow continuous use of the park while segments are being replaced or renovated.
