## **ST LOUIS CENTRAL BUSINESS DISTRICT STREETScape**

The HOK Planning Group developed an enhanced schematic design package for streetscape improvements to the Central Business District in St. Louis, Missouri. The streetscape program is designed to improve streets and streetscape within the core of downtown St. Louis.

As a result of this program, pedestrians will find walking in downtown to be an inviting, safe, logical and exciting experience. In addition, the streetscape improvements help to organize and define the urban hierarchy within the district.

This work emanates out of the Downtown Development Action Plan for the City of St. Louis, adopted by the City.

The program area comprises approximately 60 blocks in the core of downtown St. Louis.

The program connects significant public assets including, Washington Avenue, the Edward Jones Dome, the Gateway Mall, Busch Stadium, Cupples Station and the Old Post Office.
