SAN JACINTO COLLEGE CENTRAL PARKING LOT

This project is part of the Public Spaces & Streetscape Category:

- Creation of a signature landscape design for a 2,400 car parking lot
- Central access paver walkway with lighting provides a safe and direct access to the main building entrance
- Preservation and relocation of existing trees allowed both environmental and budget savings
- The bold allée of live oaks and understory plantings creates a stately, dramatic and inspiring campus entry
- The design provides a precedent for an orderly landscape that is symbolic of an institution of higher learning.
