CEDAR PARK COMPREHENSIVE PLAN UPDATE

LAN updated the City of Cedar Park's Comprehensive Plan, with a specific goal of identifying appropriate zoning for the remaining undeveloped land, to ensure a healthy mix of residential, commercial and industrial uses.

The final product produced by LAN included:

- an updated Future Land Use map with a narrative of what changes were made and why,
- evaluation metrics such as balance of tax revenues,
- recommendations of utility and transportation considerations to support the desired Future Land Uses,
- and documentation of the process including surveys, public presentations and other citizen input.
