CITY OF BRYAN, DOWNTOWN STREETScape IMPROVEMENT PLAN

As part of Phase I, LRK led the design intent for the Main Street Streetscape in the City of Bryan, TX. LRK worked alongside with Turner, Collier, & Braden Engineers to develop the Phase I construction drawings including considerations for:

- street festivals and downtown activities
- emphasize the Carnegie Library as an anchor and focal point
- provide refuge for pedestrian circulation within the Main Street Island
- create an attractive and functional design for vehicular traffic and parking over a four
- block area within a right-of-way with multiple widths
- develop an inviting pedestrian realm through the use of pavers, street trees, street
- furniture, and pedestrian scale lighting
- incorporate accessible parking and circulation routes for the handicapped
