

WIMBERLEY BLUE HOLE REGIONAL PARK  
City of Wimberley, Texas

In 2006, The City of Wimberley purchased 126-acres surrounding the historic Blue Hole swimming hole located on Cypress Creek. This key investment will ensure that the historic swimming hole remains a value asset for the community and visitors.

Design Workshop has been retained to provide park design and landscape architecture for the 126-acre site from concept through full implementation. The park will include the preservation and recreation of the Blue Hole, in addition to camping, hiking, tennis courts, volleyball courts, picnicking facilities, amphitheaters, environmental restoration and parking.

Construction will commence in 2010.
